

AET Programme Committees 2012-2013

(Name of committee chair shown in bold type)

Pan-European Transport Policy

The Pan-European Transport Policy committee seeks papers that are concerned with pan-European policy and its application at both European and national levels. We are interested in papers that address research and its application on issues that have a trans-national context. Areas of special interest are: policy impacts of the EC Action Plan on Urban Mobility; transport policy which is being developed at supranational and national level to promote jobs; the effects of globalisation; and air transport related issues

Transport Models

Innovative and applied methods in transport planning have long been a mainstay of the programme of the European Transport Conference. For the 2013 Conference, a single committee will oversee the submissions, then smaller groups will be formed to make detailed assessments of abstracts according to topic and focus. Submissions are sought from authors who have completed or are in the process of completing research or projects which move forward the theory and practice of modelling in transport policy and planning.
