

**European Transport
Conference**
18 – 20 September 2024
Antwerpen, Belgium

CALL FOR PAPERS
Deadline 9 February 2024

Aviation Topics

The world of aviation planning and design is experiencing many challenges and at the same time opportunities and the transport sector related to aviation will play a key part in the development of airports around the world.

If you are involved in the aviation industry, we would encourage you to submit an abstract at our forthcoming conference in Antwerp, Belgium. Topics that are of interest include;

- Surface access and climate change challenges
- Multi modal case studies for landside access
- Surface access transport masterplans and strategies
- Economic assessments
- Passenger forecasting and modelling
- Policy related studies
- Environmental impact challenges including examples on approaches taken
- Future technology effects on landside transport
- General airport case studies

Important notice

If you submit an abstract, this will go through a selection process. Each year we receive more abstracts than can be accommodated in the programme. If your abstract is selected, please be aware that others have been rejected, that the ETC organisation has invested time in devising an attractive and coherent programme and that delegates have used this programme to decide to come to the conference.

Before submitting your abstract, please make sure there is time and funding to have at least one of the authors attending the conference to present the paper and that you have/will obtain the approval needed (from management or client) to present the work in public at the time of the conference. The conference organisers will require your commitment by the time of the abstract's acceptance.
