CALL FOR PAPERS

Data

The use of data is gaining in maturity in the transport industry and is becoming a focal point in aiding decision makers when selecting Transport policies, strategies and infrastructure projects.

We are looking to invite papers that cover themes that include:

- Big data and its applications
- Data usage for single and multi-modal modelling purposes
- Data applications for major infrastructure provision/ projects
- Application of data in a policy context
- Innovative data techniques
- How to manage data
- Processing of data and lessons learnt
- Technology advancements in data capture and analysis
- The future of data? Where are we heading?

Important notice:

When you submit an abstract, this will go through a selection process. Each year we receive more abstracts than can be accommodated in the programme. If your abstract is selected, please be aware that others have been rejected, that the ETC organisation has invested time in devising an attractive and coherent programme and that delegates have used this programme to decide to come to the conference.

Before submitting your abstract, please make sure at least one of the authors can attend the conference to present the paper, that finances are available and that you have/will obtain the approval needed (from management or client) to present the work in public at the time of the conference.

We do understand that sometimes circumstances change, forcing authors to withdraw. If so, you would help us by informing us as soon as possible, preferably ample time before the conference. Last minute withdrawals or no-shows negatively affect the conference experience of your fellow transport professionals.

If you need any assistance or further information, please contact Sally Scarlett: sally.scarlett@aetransport.org or Sanderijn Baanders: sanderijn.baanders@aetransport.org
