Freight and Logistics

The Programme Committee is interested in receiving papers concerning actual issues such as freight and the environment, impact of strategic logistics on freight systems, freight policy development, city logistics, trans-national networks, air cargo transport, ports, and maritime policy.

The Freight & Logistics Committee as usual welcomes papers on any topic related to freight transport and logistics, including but certainly not limited to:

- Individual transport modes (shipping & ports; air cargo transport; road, rail and inland waterway transport; pipelines)
- Multi-, Inter- and Synchromodal transport
- Greening of freight transport
- Digitalisation of freight transport
- Innovation in freight transport
- Forecasting and modeling freight transport

Important notice:

When you submit an abstract, this will go through a selection process. Each year we receive more abstracts than can be accommodated in the programme. If your abstract is selected, please be aware that others have been rejected, that the ETC organisation has invested time in devising an attractive and coherent programme and that delegates have used this programme to decide to come to the conference.

Before submitting your abstract, please make sure at least one of the authors can attend the conference to present the paper or poster, that finances are available and that you have/will obtain the approval needed (from management or client) to present the work in public at the time of the conference.

We do understand that sometimes circumstances change, forcing authors to withdraw. If so, you would help us by informing us as soon as possible, preferable ample time before the conference. Last minute withdrawals or no-shows negatively affect the conference experience of your fellow transport professionals.

European Transport Conference
6 – 8 September 2023
Milan, Italy
CALL FOR PAPERS
