

Freight and Logistics Programme Committee

The Programme Committee has highlighted areas of interest for the 2018 Conference:

- **Synchro-modal and intermodal transport**
- **Digitalization in logistics**
- **Corridor management and particularly the logistic services.**
- **Smart logistics: smart mobility (road, truck platooning, ..., smart rail, smart shipping, automated cranes, ...)**
- **Information sharing in logistics (privacy and business sensitive data, pro's and contra's, optimization processes, planning, ...)**
- **Economic sustainability of freight transport innovation**
- **Internalization of external costs – impacts and requirements on logistics**
