

European Transport Conference
9 – 11 October 2019
Dublin Castle, Dublin, Ireland

CALL FOR PAPERS

Data

Data is becoming more and more prominent in our profession and is being promoted to push boundaries beyond transport also for example to aid smart cities solutions.

Themes could include;

- Use of data in area wide modelling
- Use of data to understand how businesses operate
- Use of data to promote inclusive and sustainable travel
- Use of data to advance technological solutions
- Lessons learnt from data capture
- How can data change our thinking towards Land use allocation?
- Can data aid decision making on future transport strategies?
- Data - a great asset help or a problem?
- Data capture - what is new on the market?
- Data usage for network resilience purposes

Important notice:

If you submit an abstract, this will go through a selection process. Each year we receive more abstracts than can be accommodated in the programme. If your abstract is selected, please be aware that others have been rejected, that the ETC organisation has invested time in devising a attractive and coherent programme and that delegates have used this programme to decide to come to the conference.

Before submitting your abstract, please make sure there is time and funding to have at least one of the authors come to the conference to present the paper and that you have/will obtain the approval needed (from management or client) to present the work in public at the time of the conference.

We do understand that sometimes circumstances change, forcing authors to withdraw. You would help us by informing us as soon as possible, preferable ample time before the conference. Last minute withdrawals or no-shows negatively affect the conference experience of your fellow transport professionals.

If you need any assistance, please contact Sally Scarlett: sally.scarlett@aetransport.org
