

**European Transport Conference**  
**6 – 8 September 2023**  
**Milan, Italy**  
**CALL FOR PAPERS**

## **Aviation**

We are excited to have formed a new Aviation committee which will allow us to hopefully attract papers and participants from a range of specialist topics in the world of aviation. Aviation is seeing many challenges throughout the world in addition to the Covid pandemic and a lot of work is being carried out to support airports heading towards being a more sustainable industry. Transport plays a key part in helping the industry move towards a more environmentally friendly product.

If you work in aviation or are related to this industry, we would welcome you considering an abstract at our forthcoming Milan conference.

We are interested in topics that include.

- Climate change and effects on surface access
- Case studies that include a transport element
- How airports will respond in transport terms to the sustainability agenda
- Economic analysis and trends Operational performance
- Policy responses in your chosen country Innovative design ideas that contribute to a more sustainable transport offer
- Forecasting challenges

### **Important notice:**

When you submit an abstract, this will go through a selection process. Each year we receive more abstracts than can be accommodated in the programme. If your abstract is selected, please be aware that others have been rejected, that the ETC organisation has invested time in devising an attractive and coherent programme and that delegates have used this programme to decide to come to the conference.

Before submitting your abstract, please make sure at least one of the authors can attend the conference to present the paper or poster, that finances are available and that you have/will obtain the approval needed (from management or client) to present the work in public at the time of the conference.

We do understand that sometimes circumstances change, forcing authors to withdraw. If so, you would help us by informing us as soon as possible, preferable ample time before the conference. Last minute withdrawals or no-shows negatively affect the conference experience of your fellow transport professionals.
