European Transport Conference 2018

CALL FOR PAPERS

Global Trends Impacting Transport Programme Committee
Chair: Jan Kiel, Panteia, NL

Mission Statement

The transport system is influenced by key drivers such as demography, economy, society, technology, environment and politics. Different trends in these areas such as individualization, urbanization or climate change may change the functioning of the transport system profoundly. The Programme Committee on Global Trends Impacting Transport (GTIT) covers the broad area of key drivers and trends. The committee seeks discussion with policy makers, academics and practitioners to understand these impacts and their consequences for the transport system. The committee is interested in attracting papers that comprise a broad range of topics that include scenarios, good practice, policy responses, research and specific trends impacting transport such as climate change, migration, personalisation, sustainability, globalization, terrorism, debts, new technologies, ageing and many more.

Smart Cities, with papers on topics such as transport policies for smart cities, or green moves in smart cities.

Core and periphery,
With papers on topics such as transport and territorial cohesion in core and peripheral economies, multi-lateral policy and project implementation in TEN-T corridors, implementation of transboundary and cross border policies and projects

Digital age
With papers on technology and mobility, the role and impact of social networks on travel choice and behaviour

Human factors
With papers on travel decicion making, ageing and demographic impacts on travel trends in Europe, social and economic challenges of transport, individualism and its impact on transport

Externalities
With papers on security and transport policy, policy measures to handle externalities, the impact on the transport system of climate change and extreme weather events

Trends and scenarios
With papers on scenarios for future transport and mobility, enhancing electro mobility, shared mobility services
